Education

Universidad Creativa
Associate Degree in Full Stack Development (In Progress)
February 2024 - Present

Technical Skills

•JavaScript	•React	•NodeJS	•Git
•HTML	•Angular	•Express.js	•Github
•CSS	•Bootstrap	•SQL Server	•VsCode
•TypeScript	•Tailwind	•Python	•Postman

Experience

Personal Projects

2025 – Present
Full Stack Course Management System
Built a full stack web application to manage academic courses with full CRUD functionality. The frontend uses React with Redux for state management, focusing more on functionality than on styling. The backend is developed with Node.js and Express using MVC architecture. Data is stored in SQL Server, with stored procedures handling database operations securely and efficiently. This project demonstrates practical full stack development experience and API integration.

Personal Project: E-commerce Website – primeparts-cr.com
2024 – Present

I developed and launched an e-commerce website using React for the frontend, along with Tailwind for styling, ensuring a responsive and user-friendly platform. The website is designed for vehicle parts, accessories, and tools, allowing users to browse the catalog, make purchases, and submit inquiries through a contact form. Git and GitHub were used for version control throughout the development process.

2024 – Present

- Created multiple web-based projects, including a Task Manager App, E-commerce, and a Portfolio.
- Gained hands-on experience with JavaScript, React, Angular, NodeJS, Data Base, and TailwindCSS.
